

ARYA PRADITHA

COMPUTER SYSTEMS STUDENT | IoT | EMBEDDED SYSTEMS | MACHINE LEARNING | CREATIVE TECHNOLOGY

Bali, Indonesia • +62 859 3115 2688 • aryaditha13@gmail.com
Portfolio: bimbimbo2003.github.io/portfolio-aryapraditha/

PROFILE

Computer Systems student at ITB STIKOM Bali with a strong interest in Internet of Things (IoT), embedded systems, microcontrollers, machine learning, and creative technology. Experienced through academic and project-based work using ESP32, Arduino, Raspberry Pi, sensors, Python, TensorFlow/Keras, and web-based control systems. Also interested in videography, project documentation, and visual storytelling.

EDUCATION

ITB STIKOM Bali — Computer Systems
Current student

CORE SKILLS

IoT & Embedded Systems: ESP32, Arduino, Raspberry Pi, sensors, microcontrollers, basic automation, device integration
Programming & Web Control: Python, basic web development, web-based hardware control, data processing
Machine Learning: TensorFlow, Keras, CNN, image dataset preparation, preprocessing, model training and evaluation
Creative Technology: Videography, project documentation, visual storytelling, video editing
Tools: Arduino IDE, Google Colab, Visual Studio Code, CapCut, Lightroom, Canva

SELECTED PROJECTS

Kosabangsa Smart Farming

Member of a student team implementing a smart farming solution in Kedisari, Kintamani. Contributed to IoT-based soil monitoring, automatic irrigation concepts, system integration, field testing, and documentation.

Smart Trash Bin

Developing an IoT-based waste management prototype. Contributed to system concepts, prototype development, sensor and microcontroller integration, testing, and feature development.

Embedded Machine Learning — Trash Classification

Prepared image datasets, performed preprocessing, helped build and train a CNN model with TensorFlow/Keras, and evaluated classification performance for future embedded implementation.

ESP32 Web-Controlled Car Controller

Built a robotic car prototype using ESP32, DC gearmotors, motor driver, Wi-Fi, and a web-based control interface. Performed assembly, wiring, programming, testing, and troubleshooting.

Creative Videography — IoT Documentation

Created visual documentation for technology activities, including IoT equipment installation in Bedugul, combining project documentation with videography and visual storytelling.

CORE STRENGTHS

- Problem solving — analyzing project issues and identifying practical technical solutions.
- Learning agility — adapting to new tools and technologies through hands-on project work.
- Teamwork — collaborating in academic and field-based project activities.
- Creative thinking — combining technical systems with clear visual communication and documentation.
